

## UTCA's \$0 Integration and \$10.00 Security Program

Get access to the financial transaction industry's most powerful and secured payment gateway with **no setup and integration fees**. All features are included in one monthly service fee of \$10.

Traditionally, merchants are priced on services based on: integration hours/depth of services and paying a surcharge for added value products like invoicing, accounting, dashboards, links for websites, level II & III processing, etc. These will be included for one low monthly cost: **relationship**.

You're concerned with your payment data security and now you can process checks (guaranteed and conversion) and credit cards using a state of the art payment gateway with the highest level of certification and PCI Compliance.
